Database Model

A User can gave many conditions, resources, and tips

A Resource can have either an article, video, or image content. Depending on the content, the resource can have text or URL.

A basic Condition model just has a name and description

Condition

```
{
  _id: ObjectId("CCC1"),
  name: "String",
  description: "String"
}
```

Tip

```
{
  _id: ObjectId("TTT1"),
  title: "String",
  content: "String",
  tags: [
    "String"
  ]
}
```

A basic Tip model just has a title, content, and tags.

User

```
{
  _id: ObjectId("UUU1"),
  username: "String",
  email: "String",
  password: "String",
  profile: {
    "age": "Number",
    "gender": "String",
    "chronicConditions": [
      {
        "id": "ObjectId",
        "name": "String"
      }
    ],
    "savedResources": [
      {
        "id": "ObjectId",
        "savedAt": "Date"
      }
    ],
    "savedTips": [
      {
        "id": "ObjectId",
        "savedAt": "Date"
      }
    ],
    "preferences": {
      "contentInterests": [
        "String"
      ]
    }
  },
  "createdAt": "Date"
}
```

Resource

```
{
  _id: ObjectId("RRR1"),
  title: "String",
  type: {
    type: "String",
    enum: [
      "article",
      "video",
      "image"
    ]
  },
  content: {
    type: "Object",
    properties: {
      text: "String",
      url: "String"
    }
  },
  conditions: [
    {
      conditionId: "ObjectId"
    }
  ],
  tags: [
    "String"
  ]
}
```
